Dumpster/trash compactor enclosures guidelines

Dumpster enclosures must be completely enclosed on all sides.

Constructed of reinforced concrete block or concrete and have the same exterior appearance as the principal structure.

The doors must be of a solid opaque appearance.

The clear opening width must be 10'.

The height must be at least 1' higher than the tallest container to be used.

If there is a drain in the enclosure:

It may not drain into the storm system.

It must have a grease interceptor.

If it is drained into the sanitary system, it must:

Have a locking drain cover.

Have a roof cover.

If the walls are not continuous to the roof they must be covered with louvered slats from the top of the concrete walls to the roof deck.
